

CASE STUDY

Project Name: Aldi New Stores (UK)

Client: Aldi Supermarket Company

Contractor: JB Construction

Area: Circa 1000m²

Product Used: Resiblock Resiecco

Date: January – September 2024

The Sites:

Since 2013, Resiblock has been entrusted with the sealing of paving at all newly opened Aldi Stores across the United Kingdom. Resiblock had liaised with Aldi's consultants, and following extensive trials Resiblock Resiecco was duly specified.

In 2024 alone, Resiblock has been specified and utilised at 5 New Aldi stores in; Newport, Cardiff Ely, High Wycombe, Totton and Aberdare.

The Challenge:

There is no compromise when it comes to new store fit-out specifications and the Aldi property development team wanted to protect the external paving to ensure low-maintenance and long-term stain protection.

The Solution:

Resiblock Resiecco is a specialist one pack water-based paving sealer which stabilises the jointing sand, preventing its erosion from heavy duty cleaning regimes, whilst providing significant stain protection to the surface of the paving. Once cured, it remains fully elastomeric thereby accommodating the small elastic deflections incorporated with the pavement design.

Benefits at a Glance:

- Prevents jointing sand loss from cleaning regimes & heavy footfall
- Significantly reduces staining by food & drink & eliminates residual chewing gum stains
- Water-based (solvent-free) environmentally friendly sealer that can be used both externally & internally and in sensitive areas such as colleges, schools & shopping centres
